Adobe Bridge Adobe Bridge (Figure 4.7) is the central place to manage and organize your images. It organizes your images into collections and allows you to tag your images for future identification. It acts as a repository for images and can link to photos in Flickr (more on Flickr in Chapter 5), Picasa Web Albums (more on Picasa in Chapter 6), or other online albums. With Bridge you can tag images with keywords, store multiple versions of the same image, add tags to multiple images at one time, share images in social media, and manage the dimensions of images. **Figure 4.7** : Use Adobe Bridge to organize and manage your images. Bridge is a powerful but user-friendly tool. You can use Bridge to organize, tag, and catalog your images at the same time. Simply import images from your camera or from storage onto Bridge's panels. Then use the tools below the panels to manipulate images and use the panel as a canvas for adding text or drawing. You can: * Add text, lines, and arrows to the panel. * Add multiple images, shapes, and text to the panel. * Add filters, transitions, and effects to images. * Create and edit smart objects. * Export photos to a wide variety of formats including JPEG, TIFF, and PSD. Bridge also helps you find images, and it keeps a history of any edits you've made to an image. If you have multiple Adobe software applications and you want to tag or organize images in multiple applications, Bridge is the easiest way to do so. Bridge allows you to save the changes and history of your images so that you can locate them easily in the future. Bridge has been a convenient tool to manage your images, but in recent years it has been replaced with more modern tools such as Adobe Lightroom (see Chapter 6). However, the original Bridge software remains and is one of the most powerful tools that Photoshop offers. You need the latest version of Adobe Bridge, which is always free, to access and organize your images in Photoshop. Adobe asks that you download it directly from

A new method to measure bias in calculated protein stability. Thermodynamic parameters of proteins can be readily determined from the unfolding thermograms. In this report, a new method is described to measure the binding free energy of a protein (ΔG) to the surface of a model membrane. The method involves the comparison of the unfolding transition of the apoprotein with that of the complex formed by apoprotein and lipids by using a simple thermodynamic approach. Experimental analysis of DeltaG with the Trp-cage shows that apoprotein and complex of apoprotein and lipid form in a 1:1 stoichiometry. This stoichiometry is maintained up to a temperature of about 50 °C. Above that temperature, the complex dissociates from the lipid surface causing the calorimetric traces to deviate from a single Gaussian peak. The dissociation of the complex from the membrane can be used to estimate the affinity of the protein for the membrane. The results presented here indicate that standard calorimetric methods are unable to measure the affinity of proteins for the lipid surface since the stability of the protein depends on the surface pressure in which the lipid-protein mixture is incubated.For indispensable reporting on the coronavirus crisis, the election, and more, subscribe to the Mother Jones Daily newsletter. As certain members of Congress move to repeal the Affordable Care Act and Republicans insist that "Obamacare's days are numbered," a new report details the implications of repeal for the nation's seniors. "I am concerned about what these reports may imply," said San Diego's congressman in a statement. In a report released Thursday, the Center for American Progress found that if the Affordable Care Act (ACA) is repealed, "seniors will face nearly 1,000 percent increases in drug prices, 4,000 percent increases in premiums, and long wait times to get basic care in emergency rooms." If Republicans succeed in axing the law, premiums could rise as much as 1,000 percent in some cases, according to the report. "Without the provisions of the Affordable Care Act, seniors will face the danger of longer waits for care, larger premiums, and worse access to care," said [Congressional Budget Office director and report co-author] Jake Leinenweber in a statement. "This is a big deal." The report shows that the repeal of
