## About This Game

### Beyond the City VR

"Beyond the City VR " is a tower defense game. Come and join the ongoing war, play the role of the commander & soldiers to resist the invaders in an open world. Choose between multiple powerful tower and unique epic skill! With the wide variety of towers we can create our own perfect strategy. Enjoy a visually stunning tower defense game in VR world.

There're two 2 mode for experience----- 1st is macro layout defense tower and 2nd is FPS micro-operation

#### Play Mode:

1 The commander role | Strategy level

Global macro layout overview of the map and fully take use of the resource in hand. 1st, we play as the role of commander to arrange the tower power on the map. 3 different type of towers are available in demo version, each of them can be upgraded by using money in game, with diversity attack mode.

2 The Soldiers role | Tactics level

FPS micromanagement, once the layout is completed, the player steps into the tower (Archer Tower/ Magic Tower/ Turret) to manipulate the weapon to against the invader. No mercy.

With the progress of the game, the invaders have multiple waves of attack, the swordsman, the priest, WM warriors, and summoned forest demon.

Shooting with bows and arrows, using magic wand cast, or artillery bombing? Up to you!  
Come on to scavenge any threats from the enemy.:

beyond the city vr ps4. beyond the city vr

Actually a very impressive DLC. It adds a new mode with Dreadnought and it is very good and it brings a new wind to the game. But there is one big problem - there is not enough people to play it. It is practically impossible to find a match now. Only chance is to setup a game with your friends.. it's not a good game tbh.. Is there Xbox controller support?

I purchased it to hone my controller skills and was disappointed I could not seem to get it to fully work with the controller.

Any chance it will happen in a future update?

. You actually fly around, glide, ski on mountains !!. That's the Mang0.. Sorry but this is well before early access. Firstly, when you press to move forward you move 2 steps, which is annoying. The stepping issue actually effects the gameplay because of the tight spaces the player is in. Some of the sounds are just straight up pulled from bioshock, which is strange. The door opening sound throws you out of the gaming experience and into AIM nostalgia. I stopped recording because I ran out of battery and just started stumbling around and could not see anything. Ran out of battery at 39% which does not seem quite right. In its current state it seems that not only is it not worth the money but it will most likely not drastically improve. Seems that the snapshots shown were nitpicked and do not give an accurate representation. Getting a refund and would not recommend.

Edit: And one other thing. The flashlight is so wonkey. It is so small, you are able to make it bigger but the second you get close to something the flashlight goes away.. I can't recommend this game after playing other GP games and Ride 2 - why?

+ gameplay and physics are nice, but that's it for me

+ a GTX 1070 can handle this game at maxxed setting 1080p allways at 120fps

- graphics are blurry af even with motion blurr and ( the crappy UE4 ) AA turned off

- getting rid of the blurr needs 4k downsampling ( 200% resolution slider ) which drops my fps from 120fps solid to 50-55fps and in menus even down to 30 fps (!)

- sharpness difference of sharp rendered menu parts ( player / bike ) vs blurry fonts hurts eyes and brain

- cutscenes and replays look utterly bad, because everthing is drowning in blurr and depth of field ( never seen such a bad implementation of DoF in a game )

- sound seems to be 1:1 from MotoGP 17 (!)

So yes - my issues are mostly the graphics issues but i like my games sharp and detailed.

And looking at this blurred bike simulator 2018 is not a joy right now.. I really like the game, it's like a portal 2D V Om, very simple and addictive. Also, I really enjoyed minimalistic interface, you can start playing without reading any single word, so awesome, I hate long boring tutorials.. Exelent Game
